

Statement of Warranty

In the event of any material failure (other than timber) or structural faults occurring within twelve months of the delivery date and attributable to the work of Furphy Foundry Furniture, the relevant parts will be made good by Furphy Foundry entirely at our cost in the shortest practicable time.

TIMBER: The performance of timber on site in circumstances beyond our control is not guaranteed beyond three months from the date of delivery. Furphy Foundry Furniture uses only furniture grade select kiln dried hardwood species of excellent durability standards. During our assembly and dispatch process any timber components with visible damage or faults will have been rejected by our staff.

OIL STAINING: Due to the dense nature of the timbers used in throughout Furphy Foundry range of products, initial oil staining treatment will have limited penetration and therefore will normally require re-oiling within six months dependent upon exposure circumstances. Subsequent oil staining will gain improved penetration as a result of weathering of the timber surface. The period between re-staining treatments will extend in time to a yearly, or more extended, schedule.

REPLACEMENT PARTS: Framing components, timber slats and fixings, can be made promptly available as replacement parts at any time. Typically, replacement parts are only ever requested after damage via undue circumstances.
