

Metro Picnic Setting and Street Furniture

The Metro Picnic Setting is an item of street furniture that has been designed and manufactured to last.

Combining cast-aluminium, Australian hardwood timber slats and high-quality stainless steel componentry, the Metro Picnic Setting is as pleasant to look at as it is to sit on.

Because of the materials used, the Metro Picnic Setting is resistant to rust. This is hugely advantageous for coastal and outdoor environments where rust can be a major issue.

Available in either standard, disabled access or disabled access (both ends) and customisable in terms of powder coating colours, the Metro Picnic Setting is part of the Metro Suite - consisting of a matching Picnic Setting, Seat, Bench, Litter & Recycling Receptacle.
