

Walk or drive on

Removed with a twist, this brought-breaking bollard leaves nothing but a flat, strong, weight-bearing surface

GROUND-BREAKING
NEW PRODUCT

Base remaining after bollard is removed.

Innovative removable stainless-steel bollard

This new removable stainless-steel bollard from **Furphy Foundry** introduces an innovative solution to a long-standing problem associated with removable bollards.

When the bollard is removed, a permanent, solid, flat surface is all that remains. No trip hazards and with a weight-bearing threshold that can easily accommodate vehicular and pedestrian movement.

Features include:

- No additional lock required to secure the cap when the bollard is in or out
- No hinges, springs, therefore far less likely to break
- Lock/key only 50mm above the ground – less moving parts
- Bollard removed with just an unlock/easy twist.

This removable stainless steel bollard is one product with the **Furphy Foundry Impact and Pedestrian Protection range**, street furniture designed to ensure safety for crowded places or wherever pedestrians are present near roads.

With a 150-year history, Furphy Foundry is renowned for robust products that stand the test of time.
