Standard Colour Range

## Powder coat colours

Powder coating is an effective solution for finishing metal products due to its robust performance and good value. At Furphy Foundry we generally use the Dulux® range of colours and finishes to form our standard and premium colour ranges, we can also apply other brands on application. We suggest applying a 2 pack epoxy paint over hot dipped galvanised steel for coastal environments that need extra protection or to meet specific colour requirements. For more information on powder coat colours visit the Dulux® powder coat website.

*When selecting colours it is important to realise that printing and computer screens may not accurately represent the intended colour accurately and should be used as a guide only.*
